

# Render Workflow

## 1 Click "New Web Service"

### Static Sites

**Static Sites** are automatically served over a global CDN. Add a custom domain and get free, fully-managed SSL.

New Static Site

### Web Services

**Web Services** include zero-downtime deploys, persistent storage and PR previews. Scale up and down with ease.

New Web Service

### Private Services

**Private Services** are only accessible within your Render network and speak any protocol.

New Private Service

### Cron Jobs

With **Cron Jobs**, you can schedule any command or script to run on a regular interval.

### PostgreSQL

Fully-managed hosted **PostgreSQL** with internal and external connectivity, and automated daily backups.

### Redis

A cloud based in-memory key datastore. Render offers fully managed hosted **Redis** instances.

## 2 Click "Connect"
